# ASHISH RAJ

Frontend Developer | Web Developer | Fresher | Seeking Frontend Developer Internship
Muzaffarpur, Bihar, India | +91 9525003016 | rajshish37@gmail.com | Open to Relocation
LinkedIn: linkedin.com/in/ashish-raj-b20237234 | GitHub: github.com/Ashish141Raj
Live Project: webweatherr.netlify.app

## PROFESSIONAL SUMMARY

BCA graduate and fresher Frontend Developer skilled in HTML5, CSS3, JavaScript, Tailwind CSS, DOM manipulation, Fetch API, REST API integration and responsive web design. Experienced in building responsive, user-friendly web applications with dynamic UI updates, asynchronous JavaScript, JSON data handling, Geolocation API and Local Storage. Built and deployed WebNova, a real-time weather web application with live API data, city search and geolocation, and SkyCast, a Tailwind CSS weather application. Strong foundation in Java, SQL, MySQL, and Data Structures and Algorithms. Currently learning Java backend development: Spring Boot, Hibernate, JPA, Maven and REST API development. Seeking a Frontend Developer internship to build responsive, user-friendly interfaces on real-world projects.

## TECHNICAL SKILLS

**Frontend:** HTML5, CSS3, JavaScript, Tailwind CSS, DOM Manipulation, Event Handling, Responsive Web Design, Web Application Development, UI Development
**Concepts:** REST API Integration, Fetch API, Asynchronous JavaScript, JSON, Geolocation API, Local Storage, Dynamic UI Updates, Error Handling, Problem Solving, Data Structures and Algorithms
**Programming & Database:** Java, SQL, MySQL
**Tools & Platforms:** Git, GitHub, Version Control, VS Code

## PROJECTS

### WebNova Weather Website | HTML5, CSS3, JavaScript, Fetch API, Weather API

Live Demo: https://webweatherr.netlify.app | GitHub: https://github.com/Ashish141Raj/WebNova-Weather-Website

- Developed a responsive, real-time weather web application that lets users search live weather conditions by city name.
- Integrated a third-party Weather API using the Fetch API and asynchronous JavaScript to fetch and display live weather data.
- Implemented geolocation-based detection with the browser Geolocation API to show weather for the user's current location.
- Designed a modern glassmorphism interface with dynamic weather icons and animated transitions for a smooth user experience.
- Ensured a responsive layout across desktop, tablet and mobile devices, added error handling for invalid inputs, and deployed the application live using Git and GitHub.

### SkyCast Weather Application | HTML5, JavaScript, Tailwind CSS, Weather API, Local Storage

GitHub: https://github.com/learning-projects-lab/SkyCast

- Built a weather application that fetches and displays weather data from a Weather API.
- Used browser Local Storage to store data on the client side and styled the user interface with Tailwind CSS.

### Learning Repositories | HTML, CSS, JavaScript, Java

GitHub: https://github.com/Ashish141Raj

- **JavaScript Programming Practice** (49 commits): operators, control flow, loops, functions, arrays, objects, DOM manipulation, events and event handling.
- **HTML and CSS Practice** (8 commits): HTML basics, CSS basics, CSS box model, text styles, images, display property, div element.
- **Java Programming** (84 commits): operators, conditionals, loops, pattern printing and number-based problems.

## EDUCATION

**Bachelor of Computer Applications (BCA)**, 2023 – 2026 | 77.63%
Babasaheb Bhimrao Ambedkar Bihar University, Muzaffarpur, Bihar, India

## CURRENTLY LEARNING

**Java Backend Development:** Spring Boot, Hibernate, JPA, Maven, REST API Development
**Database:** MySQL, SQL
